

MB5000RU Series

Compact, 1 x 2 Inch 50W, 4:1 Input Range DC/DC Converters

Key Features:

- 50W Output Power
- 4:1 Input Voltage Range
- 1,500 VDC Isolation
- Very High Efficiency
- Compact 1 x 2 Inch Case
- Ten Standard Models
- Remote ON/OFF Control
- Industry Standard Pin-Out

For heatsink option, add suffix "H" to model number (i.e. **MB5024S-03RU-H**)

Notes:

1. Start up time is measured at nominal input and with a constant resistive load.
2. Load regulation is specified for a load change of minimum load to full load.
3. When measuring output ripple, it is recommended that an external 1 µF capacitor and 10 µF capacitor be connected in parallel from the +V_{OUT} to the -V_{OUT} pins.
4. Transient recovery is measured to within a 1% error band for a load step change of 25%.
5. Short circuit protection is provided by a "hiccup mode" circuit.
6. Operation at no-load will not damage the unit.
7. It is recommended that a fuse be used on the input of a power supply for protection. See the Model Selection table above for the correct rating.

Remote On/Off

Applying a signal to pin 3 will turn the unit ON/OFF. If the pin is left open, the unit operates. If grounded, the unit will shut off. The specifications for the ON/OFF function are:

Parameter	Min	Typ	Max	Units
Supply On	3.5		12.0	VDC
Supply Off	0.0		1.2	VDC
Standby Input Current		2.5		mA
Control Common	Referenced to Negative Input (pin 2)			
Control Input Current (ON)		0.5		mA
Control Input Current (OFF)		-0.5		mA

External Trim

An external resistor may be added to adjust the converter output.

To adjust the output UP, connect a 5%, 3W resistor between the minus output pin (5) and the V_{out} trim pin (6). To adjust the output DOWN, connect a 5%, 3W resistor between the plus output pin (4) and the V_{out} trim pin (6).

The trim table at right gives suggested resistor values for this adjustment.
